Standardization with Flexibility

Modular Tray System ISO

H+H FlexModul®
Reliable functionality through the realization of efficiency potentials will in future become even more important than it is today in hospitals and nursing homes. This means that it will also become increasingly important to optimize storage and logistics systems. The H+H SYSTEM can make a valuable contribution to meeting these demands. With our MODULAR TRAY SYSTEM in ISO formats for use in cupboards and trolleys, space savings may be achieved in storage and logistical processes may be simplified.

As the optimum supplement, we recommend the tried-and-tested H+H sliding dividers for storing drugs and small parts.

Various modular tray heights

- ISO standard modular trays in various heights.

Partitions adapted to the stored items

- Optimum use of space with cross-recess dividers (adjustable by half inch or inch) and with flexible sliding dividers.

Enhanced stability with patented “ClipOn”-effect

- The patented ClipOn-effect creates a secure connection between the dividers and the modules that may be disengaged at any time. This also guarantees absolute stability.

Card holders (from mini to check-card sizes)

- Card holders are available as integrated or ClipOn versions. Cards are used for locating and ordering items (double-card system).

Modular tray stoppers

- Prevents the modular trays from falling down when they are drawn out.
The Modular Tray System for Greater Efficiency

30% space saving through flexible dividing

Storing drugs

Storing liquids

Storing bandage materials, etc.

The ISO-format H+H FlexModul®

ISO standard but flexible

H+H SYSTEM's ISO-format FlexModul® is the product of choice where highest demands are placed on flexibility, efficiency and quality. This module is the result of intensive development work aimed at achieving maximum variability in storage. By combining trays and baskets into one, H+H SYSTEM has not only achieved this objective but has also created the best possible variability. The effect: low weight, optimum overview and leak-proof bases.

New! The marketed cross-recess dividers may be secured to the modular trays using the patented ClipOn-effect. They may be secured so firmly that the partitions will withstand highest lateral loads without them being forced out of their positions. The added benefit: simple and quick adjustment by every half inch or inch.

In combination with the tried-and-tested sliding dividers, this produces the greatest possible space savings and highest efficiencies.

Advantages

- Smooth walls for greater hygiene
- Fixed tray and divider positioning (ClipOn-effect)
- Partitions may be adapted to storage articles
- Bay width may be adjusted every half inch or inch
- Additional lettering or company logo possible
- Low weight
- Stackable
- Single-part stop system

Also available in PC transparent!

Solutions from the Innovation Leader

H+H SYSTEM has been concerned with intelligent solutions for storing all kinds of drugs, bandage materials, storage accessories and small components in a space-saving and clear manner for more than three decades.

The consistent development of all systems has generated experience and know-how that naturally may also be found in the new modular tray system.

- Simple and rapid repositioning of all dividers
- Quick response to changing space requirements
- High stability through patented ClipOn-effect
- Optimization of available space through the combination of flexible sliding dividers and cross-recess dividers.

Space savings

- Without dividers (0% saving)
- Fixed dividers (cross-recess) (10% saving)
- Flexible dividers (cross-recess and sliding dividers) (30% saving)

ONE MODULAR TRAY – many possibilities

- Fixed partitions with cross-recess dividers
- Cross-recess dividers with flexible dividers
- Variable partitions with flexible dividers
Options for Even Greater Efficiency
All options are available in different versions. We will be happy to assist you!

1. FlexModul dividers
2. Sliding dividers
3. Branding
4. Storage trays
5. Sub-modules
6. Card holders
7. Label bars
8. Labeling
9. Telescopic rails
10. Side panels
11. Transportation cart 32"
12. Transportation cart 60"
Standard or Custom Storage Cabinets

Choose a standard storage cabinet on the following pages or contact us for your custom storage cabinet! See options below.

Cabinets in:
- White, Gray, Cherry

2 Cabinet sizes:
- W x D x H = 18” x 27” x 84” for Trays 23-5/8” x 15-3/4”
- W x D x H = 27” x 18” x 84” for Trays 23-5/8” x 15-3/4”

Trays in 3 different heights:
- 2”, 4”, 8”

Wired baskets
in 2 different heights:
- 4”, 7”

Without doors or with doors

Wired baskets, or/and gray, or/and transparent modular trays

Side panels or/and telescopic runners
Transparent modular tray 2”
Optional labeling
Optional labeling bar
Flexible dividers
Gray modular tray 2”
Side panels
Gray modular tray 4”
Optional lock
Telescopic runner
Gray modular tray 8”
Optional door
Cabinet trays (without dividers)

Add standard dividing options and your customized configuration in the empty boxes

Set includes:
- Cabinet (W x D x H = 17-1/2” x 26” x 84”)
- 3x Side Panel (7900028)
- 4x Slotted Rail for Telescopic Runner (7930902)
- 4x Pair of Telescopic Runner (7930101)
- 5x H+H FlexModul 2” high, gray (7011050), or transparent (7021050)
- 4x H+H FlexModul 4” high, gray (7012100), or transparent (7022100)
- 3x H+H FlexModul 8” high, gray (7012200), or transparent (7022200)
- 16x Pull-Out Stopper (7910201)
